

Asian Youth Innovation Awards 2014 is to foster, nurture and encourage the youths in the field of innovative technology. This award is open to public and private secondary/high school students including polytechnics and colleges. The aim is to bring about the awareness of the importance of innovative technology that will influence a country's economic and socio-economic development. It is the platform and gateway for inventors, innovators, scientists and entrepreneurs to show case their findings. The aim here is to introduce these new innovations to targeted trade visitors and market.
