Abstrak <i>Abstract</i>	<p>The comfort of a property depends on a good environment. Therefore, a design on a building plays an important role in influencing the effectiveness of the function of the consumer space in a building. Among the key elements in a design is to apply the values of "Universal Design". The proposed project is about the construction of "Travelers Lodge" design in evaluating and focusing on the elements of UD in buildings in Bandar Melaka. There are several types of accommodation available such as hotels and guesthouses. This time with the design of space design called "travelers lodge" can produce new Melaka State products as a contributor to the economy and the attractiveness of outsiders especially to backpackers and solo travelers. The proposed project also discusses the use of the latest technology and materials by applying the concept of green technology in its design.</p>

Dapatan <i>Finding</i> (500 words max)	The proposed project is about the construction of "traveler's lodge" design in evaluating and focusing on the elements of UD in buildings in Bandar Melaka. The construction of a space design called "travelers lodge" can produce new Melaka products as a contributor to the economy and the attractiveness of outsiders especially to backpackers and solo travelers. The proposed project also discusses the use of the latest technology and materials by applying the concept of green technology in its design.	
Cadangan untuk kerja-kerja akan datang <i>Suggestion for future work</i> (500words)	Well known for its famous landmarks with historic sites. Therefore, the state of the island often gets the attention and attention of many travellers lodge for backpackers and solo travellers to come to see the historical places as well as see the old buildings that are maintained and recognized by UNESCO. My future recommendation is upgrading and increasing accommodation for travellers lodge for backpackers and solo travellers as well as contributing to the local economy.
