Abstrak <i>Abstract</i>	PROJECT INVENTORY SYSTEM USING VB AND ACCESS is an application so that lecturers can store every semester student's Final Year Projects(FYP). By this application, lecturers can reduce the using of manual process which is keeping the project's details in files and papers. This application consists Student's Projects which is DEE5081 and DEE6092. By this project, we develop a system which consists a search engine so that project's details can be search based on supervisor list. Next, we develop a database inventory system by using Microsoft Access for students projects records. And we develop an application to retrieve data of student's project easily and quickly.																
Keyword <i>Keyword</i> (max 5 word)	Inventory System Using Vb And Access																
Objektif Projek <i>Project Objectives</i>	a) To develop a system which consists a search engine so that project's details can be search based on supervisor list. b) To develop a database inventory system by using Microsoft Access for students projects records.																

	c) To develop an application to retrieve data of student's project easily and quickly.
Skop Projek <i>Project scope</i>	a) Final Year Project (DEE 5081- DEE 6092) b) List of JKE Lecturer (5 persons) c) List Of Projects (Dec16 & JUN15)
IP No	
Dapatan <i>Finding</i> (500 words max)	By this project, we can store the projects computerized by every semesters. And we can reduce the paper work of old version of projects and manual process by this project. We can increase the information of IT technologies and using of IT technologies to improve the process of the projects. We think it was a simple way to update the students project data and information in a system. Next, we can search the old semesters projects by this project. Students hard to find and get the old semesters and their senior's projects so this project can help them to solve their problems. And, students can know the old semesters projects by avoiding the same projects create. Students can know the winners of innovation day by this project. So, they can improve their projects by knowing the type of projects value for win in innovation day and pekaya day. At last, it was an application which is using by visual basic and Microsoft access. We used Visual Basic system because it easy for decorate and draft the interface of our project. Microsoft access used for a database which to save and store the data and information of student projects for the inventory system.
Cadangan untuk kerja-kerja akan datang <i>Suggestion for future work</i> (500words)	1. Creating one admin for update and edit the system/application and make public user for use the system. 2. Show the 'pop up' box when update the same supervisor id in supervisor list. 3. Develop a 'delete' button in every form to delete the wrong list. 4. Show the details clearly and all in list box.
