Abstrak <i>Abstract</i>	<p>To run an event, many things need to be dealt with and it take time. It is also the same as looking for technical, logistics and catering information manually for a long time. Looking for information manually means we need to go one by one website company. This is very complicated and takes a long time. When the time before the event was spent on searching the information or quotation, all other work will be interrupted. So for this final year project, we created a website called Fingerclick Dot Com. Fingerclick Dot Com is a website that collects technical, logistics and catering related quotations around Melaka. Users can search more than one information on this website. So this website makes it easier for users to search for information in a short time.</p>

<p>Cadangan untuk kerja-kerja akan datang <i>Suggestion for future work (500words)</i></p>	<p>New leftfield developments may seem to come from nowhere, in truth such sudden emergencies belie a great deal of behind-the-scenes planning. Now is a great time to be a market strategist. Customers are perhaps more open than ever to experimenting and fast-emerging new technologies can support new ways of doing things. The conditions for driving change and implementing new ideas have rarely been better. To quote a well-known shoe brand, just do it.</p>
