Abstrak <i>Abstract</i>	Le mini jardin is a furniture that has been use from recycle bottle. It reduce the greenhouse gas emission. Then, recycle help us reduce rubbish averaging in Malaysia. Recycle bottle is not only good for environment but is also economically feasible. Hedonic scale was used as the quantitative instrument. A number of 30 respondent were selected from Taman merlimau utara, taman bestari and taman muhibbah. Descriptive analysis was used to analyzed data collected using SPSS version 19. Result shows that the acceptance level of respondent towards the furniture is 4.43 of average mean value. Result also shows that the amount of design is high while safety is low. In conclusion, the furniture is accepted optimistically
Keyword <i>Keyword</i> (max 5 word)	Recycling of plastic bottle
Objektif Projek <i>Project Objectives</i>	• To produce desks and chairs using wasted bottles. • To know durability of a chair and table • To know that favourite level people of the desks and chair made from bottle recycle.
Skop Projek <i>Project scope</i>	The overall aim of the project improvements in existing collection and recycling systems for plastic bottle is to pave the way and provide conditions for more efficient collection and recycling of plastic bottle .
IP No	
Dapatan <i>Finding</i> (500 words max)	This chapter discuss about the analysis obtained from questionnaire distributed to citizens around Merlimau. Data collected is analyzed using SPSS version 19.
