<p>Abstrak <i>Abstract</i></p>	<p>Nail polish mainly used by women. It is very common for young girls to "paint their fingernails". People also go to salons to get their nails done..Therefore, researcher created product that is called Nail Nature Shine. The purpose of the study is to make a nail polish that is different compared to another nail polish in market which used natural ingredients in producing this product. The objective of the this product is to study the level acceptance of Nail Nature Shine among spa in Melaka Raya, Melaka and to create a chemical free product. Researcher used simple random sample and choose 50 respondents. Instrument of the research is questionnaire with likert scale of 5 that are strongly agree, agree, neutral, disagree, and strongly disagree. Researcher used Statistical Package Social Sciences version 22.0 to analyzed data findings showed the total average mean score is 2.48 which is the interpretation is medium and the level is medium. As the conclusion researcher founded that this product has less attention among the respondent because product that produce in powder form and it is a not user friendly.</p>

<p>Dapatan <i>Finding</i> (500 words max)</p>	<p>Researcher used questionnaire that have likert scale. Data collected will be analysed using the software Statistical Package for Social Sciences (SPSS) version 22.0 has been showed that the analysis of survey research data analysis using the mean score. Information contained from the product data has researcher do randomly around Melaka Raya to get feedback for product produced by researcher. The researcher findings provided in the form of frequency values based on the mean score and analysis.findings are the result of analysis the researcher conducted on the total of 50 untrained panelists to get feedback on the survey researcher in producing the products. After respondent responded all the questions, researcher will know the mean score of the all questions provided. The highest mean score is 3.24 which is the product is very easy to use. And the lowest mean score is 1.96 which is this product is suitable for those who wants to save money instead of spending money at spa. Then, rhe total average of mean score is 2.484 which is the interpretation is medium and the level is medium.</p>

<p>Cadangan untuk kerja-kerja akan datang</p> <p><i>Suggestion for future work (500words)</i></p>	<p>The first objective is to determine the level of acceptance of Nail Nature Shine. Based on the study, there are 50 respondents from Melaka Raya has accept this product with the highest score. This can be proven when all the criteria of all questions has been answered with the highet mean. Rspndents also felt that product is good and different from existing products i market. The highest mean score is 3.24 which is the product is very easy to use. The product is easy to use because of the packaging is easy to bring anywhere. The lowest mean score is 1.96 because the rspndents not having the time to polish their owm nails at home and the respondents prefer to dispense money at the spa. This product is accepted as medium by respondents. Then researcher create a chemical free product. Researcher sent the product to be tested at Melaka Biotwchnology Corporation. The result shown there is a chemical contain which is lead of 13.1. even though it was environmentally product input it due to the lead content and it might came from where the rocks are belonging. Researcher founded that the rocks were taken from the railway. It was the major factor affected the rocks eith lead. Other than that, the result also showed there were arsenic and cadmium. But, both of the result showed ND &lt;0.1 while the result of mrcury was ND&lt;0.01. Researcher want to improve the product by searching deeply about the ingredients of the product and learning more how to create a chemicsl free product.</p>
