Abstrak <i>Abstract</i>	<p>Solar energy become the fastest growing energy source in the world as it meets the environmental concern for clean power generation. Throughout this project, solar source used in the experiment will be replaced by a power supply by varying the voltage and current source to see the charge rate controlled. This technique should be able to maintain wind turbine in superior performance and prevent excessive filling. Without a doubt, it's safe and economical to be executed.</p>
