Abstrak <i>Abstract</i>	<p>RC Bag is a foldable raincoat bag that is useful for student during raining seasons. Rain water contains acid and it can affect students body and they will get sick. With our RC Bag, it is easier for student to go to class because they don't have to bring an umbrella, all they need to do when it's raining is wear our raincoat from their house to walk to class and when they have arrived, they can fold it into a bag. We use quantitative method to obtained result to know about our respondent satisfaction of the RC Bag. The result is from 30 respondents which is student from Politeknik Merlimau, Melaka. From the result we obtained, we know that majority of students is strongly agree that our RC bag are so useful to them. Things that can be done to improve our product is to create a various size</p>

	of raincoat so everyone can wear raincoat that is suitable with their size.
Keyword <i>Keyword</i> (max 5 word)	Foldable Raincoat Bag
Objektif Projek <i>Project Objectives</i>	1) To prevent students from getting wet during raining seasons. 2) To encourage students to use raincoat rather than umbrella during raining seasons. 3) To avoid tardiness and absenteeism among students because of the raining seasons.
Skop Projek <i>Project scope</i>	STUDENTS OF POLITEKNIK MERLIMAU, MELAKA

IP No		
Dapatan <i>Finding</i> (500 words max)	Research have been made through 30 respondents which is student from Politeknik Merlimau, Melaka. From the result obtain, it is known that majority of students is strongly agree that RC bag is so convenience and give many benefits to students.	
Cadangan untuk kerja-kerja akan datang <i>Suggestion for future work</i> (500words)	We suggest to create a various size of raincoat. This is for people with different height. Next, to suggest creating a different bag style such as tote bag, sling bag or backpack. It will be much better because it can attract the attention of many people. Lastly, to suggest using zipper instead of buttons for the raincoat. With the usage of zipper, the raincoat will be more secured and the probability of rain water getting inside the raincoat is low.
