Abstrak <i>Abstract</i>	<p>The research was conducted to identify the acceptance of new products of fire extinguishers and wooden beds for use in pets such as hamsters. This research is based on objective relevance, problem statement and research background. This research has been carried out among the students of the Melaka Polytechnic of Melaka. The objective of this research is to study the acceptability of durian skin residues among students at the Polytechnic Merlimau Melaka and to introduce new products from durian skin waste. The purpose of introducing this product is because there are many dumps of durian skin in the business area and around the durian orchard. In addition, durian skin residues can be widely commercialized. The data collected by the researchers were analyzed by measuring using the</p>

	Statistical Package for Social Sciences (SPSS) and using the likert scale method. The overall mean score for the questionnaire completed by the researcher was 4.27. Researchers are pleased to introduce fire extinguishers and wooden beds for use in the market and to be accepted by consumers in Malaysia.
Keyword <i>Keyword</i> (max 5 word)	IRE STARTER & WOOD BEDDING
